### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: Krehl et al. show a heat exchanger with first second and third spaces defined in header tanks by transverse partitions, communicated with first and second tubes, with a leakage hole 17 provided from the third space. No fluid outlet or inlet is associated with the third spaces, as recited in the claims, but there is no plurality of third tubes communicating with the third space; Krehl et al. instead positively teach replacing one pipe 5 with a "separation web 11" of solid cross section. Nothing in the art would suggest replacing this solid member 11 with a plurality of tubes; for example, no particular advantage or benefit is taught for the "dead tube" 12i of Marsais that would suggest such a substitution, nevermind at least doubling the number (to two) to thus decrease the useable heat transfer area defined by active tube exterior surfaces.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen J. Flanigan whose telephone number is (571) 272-4910. The examiner can normally be reached on M-F 9:00-5:30.
